

Bilingual avalanche-safety practice your learners will actually use

A free, web-based companion to recreational avalanche training (AST 1 & AST 2). Self-paced drills, realistic decision scenarios, and planning tools help students retain what they learn — while giving your organization simple cohort management and progress insight.

Free to offer

— Real practice, not flash-cards

Every tool mirrors the decisions learners face in the field — reading the bulletin, sizing grains, and making the call under pressure.

Read the bulletin
danger by elevation & problems

Identify & size grains
BCA crystal-card trainer

Make the call
multi-step decision scenarios

— What learners get

Grouped by level, plus planning tools for any stage — with plain-language explanations and a source note on every answer.

AST 1 — FUNDAMENTALS

- Slope-angle estimation
- Danger-rating calls
- Reading the bulletin
- Terrain traps & ATEs
- Beacon search
- AST 1 practice exam

AST 2 — ADVANCED

- Snowpack tests (ECT/CT)
- Snow grain identification
- Decision scenarios
- All AST 1 drills, too
- AST 2 practice exam

PRACTICAL PLANNING

- Avaluator Trip Planner
- Trip & field checklists
- Printable trip sheet (PDF)
- Habits for the field

to offer your learners

— Manage your classes in minutes

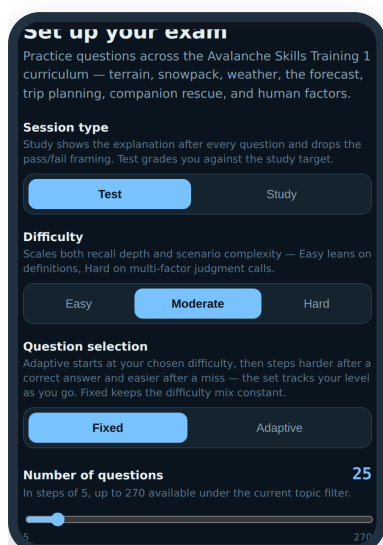

Run cohorts the way you already teach — each class gets a private join code, and you decide who's in it, how long they have access, and exactly what they see.

- 1 **Private join codes.** Create a class and the app generates a hard-to-guess code. No code, no sign-up.
- 2 **Members & access windows.** Add or remove learners; set access by weeks, a date, or unlimited.
- 3 **Show only what fits.** Reveal AST 1, AST 2, and planning tools per class — an AST 1 cohort isn't shown material beyond their course.
- 4 **Defaults & guest access.** Set defaults for new classes, and require sign-in when you want a closed group.

— Customizable practice & review sessions

Learners tailor each session to what they need — a quick topic review, a full mock exam, or adaptive practice that meets them at their level.

- ✓ **Study or test mode.** Explanations after every question, or a graded sitting.
- ✓ **Adaptive difficulty.** Steps harder after a correct answer, easier after a miss — the set tracks the learner's level.
- ✓ **Focus by topic & length.** Drill terrain, snowpack, rescue and more — from 5 to 270 questions.
- ✓ **Readiness & mastery insight.** Instructors spot weak topics before an exam or a trip; opt-in leaderboards keep learners practising.

— Rolling it out is quick

From first contact to a practising cohort in four steps.

1

Get set up
We enable an instructor account for your organization.

2

Create a class
Name the cohort; the app makes a private join code.

3

Share the code
Learners sign up and practise on their own devices.

4

Track & support
Watch readiness and extend access as needed.

A companion, not a course. AST Prep reinforces learning and builds good habits; it does not replace hands-on AST 1 / AST 2 instruction, the current avalanche bulletin, appropriate gear and partners, or careful decisions in real terrain. It is an independent, non-commercial project — not affiliated with, endorsed by, or a product of Avalanche Canada, Parks Canada, or the CAA; it references their publicly available frameworks for educational purposes.

Interested in a trial for your learners?

Ask about an instructor account and a walkthrough — we can tailor which sections each cohort sees.

avalanche-safety-training-prep.vercel.app

Offered at no cost to relevant non-profit and community organizations. Always defer to your current regional avalanche bulletin, formal avalanche training, and real-time judgement in the field.
