

Bilingual avalanche-safety practice your learners will actually use

A free, web-based companion to recreational avalanche training (AST 1 & AST 2). It helps students retain what they learn — with self-paced drills, realistic decision scenarios, and planning tools — while giving your organization simple cohort management and progress insight.

Any phone, tablet or computer

No install required

Free to offer

Avalanche courses pack a lot into a weekend. AST Prep gives your learners a place to keep the knowledge fresh afterward — and gives your instructors a window into how a group is doing before they head into the mountains.

— What learners get

AST 1 — FUNDAMENTALS

- Slope-angle estimation
- Danger-rating calls
- Reading the bulletin
- Terrain traps & ATES
- Beacon search
- AST 1 practice exam

AST 2 — ADVANCED

- Snowpack-test reading (ECT/CT)
- Snow grain identification
- Multi-step decision scenarios
- All AST 1 drills, too
- AST 2 practice exam

PRACTICAL PLANNING

- Avaluator Trip Planner (danger × terrain)
- Trip & field checklists
- Printable trip sheet (PDF)
- Habits for the field

\$0

to offer your learners

— Built on established frameworks

Content is aligned to the public tools your learners already meet in class — the North American danger scale and avalanche problems, the Avalanche Terrain Exposure Scale (ATES), the Avaluator, and CAA recording standards — with plain-language explanations and a source note on every answer.

Responsible by design. AST Prep is a study and practice aid — it does not replace professional AST training, the current regional avalanche bulletin, or judgement in the field, and every tool says so. It is an independent, non-commercial project, not affiliated with or endorsed by Avalanche Canada, Parks Canada, or the CAA.

— For your organization

Class management

Create a cohort, share a private join code, add or remove members, and set how long access lasts.

Show only what fits

Reveal AST 1, AST 2, and the planning tools per class — so an AST 1 cohort isn't shown material beyond their course.

Friendly motivation

Opt-in class leaderboards keep learners coming back to practise, with a global view for a bit of healthy competition.

Nothing to buy or install

It runs in any modern browser and can be added to a phone's home screen. No app-store approval, no licences, no cost.

Readiness insight

Per-topic mastery, a readiness score, and confidence calibration help instructors spot weak spots before an exam or a trip.

Bilingual, out of the box

Every drill, explanation, and admin control is available in English and French — learners pick their language.

— Rolling it out is quick

1

Get set up

We enable an instructor account for your organization.

2

Create a class

Name the cohort; the app makes a private join code.

3

Share the code

Learners sign up and practise on their own devices.

4

Track & support

Watch readiness and extend access as needed.

— Who it's for

Clubs, guiding and education non-profits, Indigenous and community land-based programs, search-and-rescue and youth outdoor programs — any organization that teaches or supports recreational backcountry travellers and wants an easy way to help students retain avalanche-safety fundamentals between and after courses.

A companion, not a course. AST Prep reinforces learning and builds good habits; it is not a substitute for hands-on AST 1 / AST 2 instruction, the current avalanche bulletin, appropriate gear and partners, or careful decisions in real terrain.

Interested in a trial for your learners?

Ask about an instructor account and a walkthrough — we can tailor which sections each cohort sees.

avalanche-safety-training-prep.vercel.app

AST Prep is an independent, non-commercial training aid offered at no cost to relevant non-profit and community organizations. It is not affiliated with, endorsed by, or a product of Avalanche Canada, Parks Canada, or the Canadian Avalanche Association; it references their publicly available frameworks (danger scale, avalanche problems, ATEs, Avaluator, OGRS) for educational purposes. Always defer to your current regional avalanche bulletin, formal avalanche training, and real-time judgement in the field.
